EXPERIENCE

Co-Founder & Lead Developer
MARTE — Tbilisi, Georgia / App Store: MARTE

Tbilisi, Georgia
2024 - Present

- Co-founded and led the development of MARTE, a mobile platform for automotive and service industries.
- Built features including workshop/service provider listings, loyalty/reward system, and voucher management.
- Implemented real-time updates, push notifications, and AI-assisted service prioritization.
- Oversaw the technical roadmap, architecture, and full-stack development workflow.

Senior React Developer (React Native)
CredoBank – Tbilisi, Georgia

Tbilisi, Georgia
06/2024 - Present

- Designed and implemented **reusable React Native components**, ensuring consistency across different sections of the app while speeding up the development of new features and enhancing scalability.
- Integrated **GraphQL** for efficient data fetching and real-time updates, optimizing the performance of the app and reducing network overhead compared to REST-based solutions.
- Worked with a cross-functional team including **backend developers**, **designers**, and **product managers** to deliver seamless user experiences across **iOS** and **Android** devices.
- Enhanced user experience by incorporating **push notifications** and **in-app messaging** to provide real-time transaction alerts and service updates.

Senior React Developer(Web3/React Native/Etherium)
Rad.inc

Maiami
06/2023 - 03/2024

- Led development of high-performing Next.js web applications, focusing on seamless navigation, fast load times, and SEO optimization.
- Implemented Server-Side Rendering (SSR) for efficient rendering, enhancing SEO and user experience.
- Optimized application state management using Next.js, Redux, and Context API, ensuring responsive and scalable solutions.
- Collaborated with UI/UX teams and stakeholders to innovate and align web designs with technical execution.
- Utilized Webpack, Babel, and npm/yarn for efficient frontend tooling, improving code quality and deployment processes.
- Integrated SEO best practices, including meta tags and structured data, to increase web application visibility.
- Applied code splitting, lazy loading, and SSR optimization techniques for performance enhancement.
- Conducted testing and debugging using Jest and React Testing Library, ensuring robust and error-free applications.

Architect Lead(Product Lead)
Nomadao

Tbilisi
03/2023

- Architectural Strategy: Define and implement architectural strategies aligning with business objectives, leveraging Next.js for frontend architecture and Node.js (Nest) for backend services
- Technical Leadership: Lead a team of developers, providing technical guidance, mentoring, and overseeing architectural decisions throughout the development lifecycle
- System Design & Optimization: Design, implement, and optimize scalable and efficient systems, ensuring seamless integration between Next.js frontend and Node.js (Nest) backend services
- Performance & Security: Ensure the application's performance, security, and reliability by implementing best practices and standards in frontend and backend development
- Collaboration & Stakeholder Management: Collaborate with cross-functional teams, stakeholders, and clients to understand requirements, propose solutions, and drive successful project outcomes
- Frontend: Next.js, React, Redux, TypeScript, CSS
- Backend: Node.js (Nest), RESTful APIs, Database management
- Architecture & Design Patterns: MVC, Microservices, Scalability, Optimization
- Leadership & Communication: Team management, Technical leadership, Stakeholder engagement

EXPERIENCE

Full Stack Developer

Lemondo Buss
- Angular & Node.js (Nest.js) Accomplished Senior Full Stack Developer proficient in Angular for dynamic frontend development and Node.js (Nest.js) for building robust backend solutions. Experienced in creating scalable, high-performance applications by seamlessly integrating frontend and backend technologies
- Full Stack Development: Lead end-to-end development using Angular for responsive and intuitive frontend experiences and Nest.js for efficient backend services
- Frontend Architecture: Design and implement scalable and reusable components in Angular, ensuring adherence to best practices and UX/UI standards
- Backend Development: Architect and develop RESTful APIs, databases, and backend services using Node.js (Nest.js), emphasizing performance and scalability
- Data Management: Efficiently manage data flow and state between frontend and backend, ensuring optimal application performance and responsiveness
- Collaboration & Leadership: Lead development teams, collaborate with stakeholders, and provide technical guidance and mentorship
- Frontend: Angular (including latest versions), TypeScript, HTML, CSS/SCSS
- Backend: Node.js, Nest.js, RESTful APIs, MongoDB/MYSQL (or other databases)
- Full Stack Integration: API integration, WebSocket communication
- State Management: RxJS, NgRx (if applicable), Nest.js middleware
- Testing & Debugging: Jasmine, Karma for frontend; Jest, Supertest for backend
- DevOps & Deployment: CI/CD pipelines, Docker, cloud platforms (AWS/Azure/GCP)

Full Stack Developer
Tbilisi, Georgia
02/2021 - 06/2022

Omedia
- Accomplished Full Stack Developer proficient in Angular for frontend development and Node.js (Express) for building scalable and efficient backend solutions
- Experienced in developing end-to-end applications, ensuring seamless integration between frontend and backend technologies
- Full Stack Development: Lead the development of robust and scalable applications using Angular for frontend and Node.js (Express) for backend services
- Frontend Development: Architect, develop, and maintain responsive and dynamic user interfaces using Angular, ensuring high-quality user experiences
- Backend Services: Design and implement RESTful APIs, databases, and server-side logic using Node.js (Express), emphasizing performance and reliability
- Data Management: Manage data flow between frontend and backend, ensuring proper handling, storage, and retrieval of information
- Collaboration & Problem-solving: Collaborate with cross-functional teams, participate in architectural discussions, and contribute innovative solutions to complex problems
- Frontend: Angular (latest versions), TypeScript, HTML, CSS/SCSS
- Backend: Node.js, Express.js, RESTful APIs, MongoDB/MYSQL (or other databases)
- Full Stack Integration: API integration, WebSocket communication
- State Management: RxJS, Angular services, middleware in Express.js
- Testing & Debugging: Jasmine, Karma for frontend; Jest, Supertest for backend

Frontend Developer
Tbilisi
01/2019 - 03/2021

Adjarabet.com
- Led Angular-based development for online casino platforms, ensuring pixel-perfect, responsive UIs and seamless user experiences.
- Optimized performance for fast load times and efficient gaming, integrating responsive design and cross-browser compatibility.
- Collaborated with teams to integrate frontend with backend services, adhering to gaming industry regulations and ensuring responsible features.
- Mastered frontend technologies including Angular, TypeScript, HTML, CSS/SCSS, with proficiency in Bootstrap for responsive design.
- Implemented advanced techniques like code splitting, lazy loading, and caching for performance boosts.
- Skilled in Jasmine, Karma for Angular testing, with deep understanding of online gaming industry standards.

Software Engineer
Tbilisi, Georgia
2019

Boxwood LLC — Tbilisi, Georgia
- Developed web applications using Angular (frontend) and Node.js
- Designed and implemented a bonus/reward system for Liberty Bank, including transaction tracking and user management.
- Contributed to architecture planning, technical roadmaps, and code quality maintenance.

EDUCATION

Bachelor of Science
Technology Faculty

- Business And Technology University - Georgia/tbilisi
- Awarded Programming Student
- Elaborate on the significance of the award and its impact on your academic
- Highlight any specific projects, coursework, or contributions that led to this
- Recognition
- Completed Professional Development in Programming
- Mens in Tech

Bachelor of Science
ESEI International Business School

- Bachelor of Science: Software Engineering
- ESEI International Business School - Barcelona
- Specialization Opportunities: The program allows for specialization in various
- Areas within programming, such as web development, mobile app
- Development, or software engineering, enabling students to tailor their
- Education based on their career interests
- Practical Learning: Emphasis is placed on practical learning through projects
- Case studies, and real-world applications, allowing students to develop hands
- On skills in coding, problem-solving, and software development
- Industry-Relevant Skills: The curriculum is designed to equip students with
- Industry-relevant skills sought after by employers, ensuring graduates are well
- Prepared to enter the workforce in programming-related roles
- Engaging Faculty and Resources: ESEI boasts experienced faculty members
- Who guide students in their learning journey. Access to state-of-the-art resources
- And technology aids in creating an immersive learning experience

SUMMARY

Senior Software Engineer, Full Stack Developer, and Co-Founder with 7+ years of experience delivering scalable web and mobile applications across fintech, automotive, Web3, and enterprise domains. Strong expertise in React, React Native, Node.js (NestJS), Angular, and growing proficiency in .NET ecosystems. Experienced in leading teams, defining architecture, and delivering high-performance solutions in both startup and corporate environments. Co-founded **MARTE**, a mobile platform connecting car service providers and customers with loyalty and reward features.
